Summary

Hello,

I have graduated from the Russian University of Economics as Specialist informatics economist.

I worked as an economist in Russia for large companies (such as a jewelry factory, an energy company).

After moving to Finland, I studied at the Faculty of Information Technology at the Open University of Jyväskylä (Java, C #, Databases, Algorithms), then I studied the "Full Stack open" course at the Open University of Helsinki (React, Node, MongoDB, Heroku).

In 2021 I studied software development at JAMK (continuing professional education): Full Stack programming (JavaScript, Node.js, Express, MongoDB), Web programming (JavaScript), Web server programming (PHP, MySQL, Laravel), Linux, React Programming, Data modeling and Back-end development (Node.js, Express, MongoDB, REST), Containers (Docker), Cloud Services (Google Cloud) & Kubernetes, Ansible, CI/CD, GitLab.

I work effectively in a team, take my job responsibly, purposeful.

I am looking for a job as a Frontend / Backend / Full-stack developer.

Contact me at any time.
